

Project :

1. Launch a EC2 instance for LINUX or Windows server.
2. Create a key pair for login while creating instances.
3. In Windows environment:
 - a. Launch 2016 /2019 windows server base
 - b. Connect server with RDP Client Remote access and give
 - c. Configure IIS web server through server manager and host static
 - d. HTML web page by writing our custom message.
 - e. Using public IP of our Launch instance display the message over browser.

OR

4. In LINUX environment:
 - a. Move to root user
 - b. Create 5 directories named as D1, D2, D3, D4, D5.
 - c. Move inside one directory and create one file and display it.
 - d. Invoke VI editor and perform script program.
